[Portfolio](#)

[LinkedIn](#)

Product Manager with 6+ years of experience building **AI, Enterprise SaaS, Retail Technology, and D2C Commerce** products. Experienced in product discovery, user research, roadmap prioritization, experimentation, analytics, and cross-functional execution. Built products across Fortune 500 organizations and a founder-led startup while expanding expertise in AI Product Management through hands-on work with **LLMs, AI Agents, Prompt Engineering, and AI workflow automation**.

PRODUCT IMPACT

- Built and scaled a Shopify-based **D2C commerce platform** from early-stage growth to **3× order growth, 50% reduction in customer acquisition cost, and 18% repeat purchase rate** through customer research, experimentation, and iterative product improvements.
- Led delivery of an **NLP-powered automotive support chatbot** and customer engagement automation, improving customer self-service and supporting higher purchase recovery.
- Delivered enterprise retail technology products serving Target, Kroger, Sam's Club, and Harris Teeter; contributing to approximately **8% business growth** while improving reporting performance by **25%**.

CORE COMPETENCIES

Product Management: Product Strategy, Product Discovery, User Research, Customer interviews, Road-mapping, Feature Prioritization, Product Analytics, Customer Journey Mapping, Product Experimentation, A/B Testing, Product Requirement PRDs
AI Product Management: LLM Applications, AI Agents, Prompt Engineering, RAG, AI Evals, AI Workflow Automation
Analytics: PostgreSQL, Shopify Analytics, Amplitude, Power BI, Grafana, Funnel Analysis, KPI Definition
Tools: Jira, Confluence, Figma, API Integration, Python, n8n, Claude Code, Lovable, Replit

PROFESSIONAL EXPERIENCE

Sanskriti Fab

Jul '24 – Mar'26

Product Manager (Co-Founder)

Gurugram, IN

- Owned the **end-to-end product lifecycle** for a Shopify-based D2C platform, leading discovery, roadmap planning, experimentation, launch, and post-launch optimization
- Conducted **customer interviews** and analysed **Shopify Analytics** to uncover customer pain points across acquisition, conversion, and retention funnels, translating insights into **prioritized roadmap initiatives and product experiments**
- Collaborated with Engineering, Marketing, and Operations to rapidly test product hypotheses and deliver iterative improvements, resulting in **3× order growth, 50% reduction in customer acquisition cost, and 18% repeat purchase rate**
- Evaluated and prioritized third-party integrations across payments, logistics, analytics, and marketing automation by balancing implementation effort, customer value, and business impact to **improve platform scalability**
- Led the **strategic decision to wind down the venture** after evaluating long-term unit economics, customer acquisition efficiency, and capital requirements, demonstrating disciplined product and business decision-making

Advance Auto Parts

Nov '22 – Jul'24

Product Owner

Hyderabad, IN

- Led delivery of AI-powered customer experience products, including an **NLP-based automotive support chatbot** and **cart abandonment automation**, helping improve customer self-service, engagement, and purchase recovery

- Prioritized **product backlog using RICE framework**, balancing customer needs, business priorities, and engineering capacity, ensuring roadmap alignment with customer experience and business objectives
- Converted customer problems and stakeholder requirements into **well-defined user stories, acceptance criteria, and product requirements documentation** that accelerated engineering execution
- Collaborated with Customer Support and Analytics teams to identify high-volume customer pain points and prioritize AI-powered solutions that improved self-service experiences

ReTech Labs Inc.

May '20 – Nov'22

Product Owner | Project Manager

Noida, IN

- Led product delivery for a Store Digitization platform enabling retailers to visualize real-time planograms and category performance, contributing to approximately **8% business growth** through competitive retail analytics
- Translated customer requirements into **product features, user workflows and roadmap priorities** across web application, mobile apps, and reporting dashboards
- Improved Grafana dashboard response time by **25% (3.2s → 2.4s)** by collaborating with Engineering teams on AWS infrastructure optimization, enabling faster reporting and improved user experience
- Leveraged **SQL, Power BI, and product analytics** to identify customer usage patterns and support analytics-driven product decisions

Data Analyst | Business Analyst

Noida, IN

- Built dashboards and automated reports using SQL, Python, Grafana, and Power BI
- Supported product strategy through analytics and market research
- Created **product documentation, wireframes, and user personas** to support product discovery and development

EON Electric Ltd.

Sep '18 – Jun '19
